Staffing Plan

**direct MES Manufacturing Execution System from AMS is developed through 35 years of experience in the manufacturing industry worldwide. Integrated with your ERP system, our modern market-leading MES platform provides you with a total solution, enabling you to further develop and streamline your manufacturing business.**

The product platform **direct MES** is a modular production solution, allowing you to utilise the various modules as you wish to take advantage of the extended functions of the system. This offers scalability over time, which, along with the flexibility in the platform's configuration options, can be adapted to your development.

**direct MES** is Cloud-ready, but can also be installed locally. If your company has multiple factories, the system supports distributed operation with the possibility of tailored installations at each factory.

### PLANNING

*Automated and manual planning for optimal capacity utilisation*

### PAPERLESS PRODUCTION

*Operator solution for complete control with registration and follow-up*

### WMS

*Goods reception and inventory control with efficient flow throughout the factory*
